Kenechukwu Ofili | Denver, CO | (570) 939-5874 | komofili98@gmail.com | http://www.linkedin.com/in/kofili

SKILLS

Product Management: Product Roadmapping · Customer Discovery · Technical PRDs & User Stories · Agile/Scrum · UAT Testing · Go-to-Market (GTM) Strategy · Feature Prioritization
Analytics & Experimentation: Metric Definition & KPI Dashboards · Retention & Churn Analysis · A/B Testing & Hypothesis Design · Predictive Modeling · Statistical & Trend Analysis · ROI & Scenario Modeling
Data Engineering & Architecture: Relational Database Design · ETL/ELT Pipelines · Data Quality & Validation · Data Normalization & Lineage · REST API Ingestion
Tools & Languages: Python · SQL (T-SQL, SQLite) · R · DuckDB · SSRS · Git/GitHub · QuickBase

WORK EXPERIENCE

VIAERO WIRELESS | *Fort Morgan, CO*
Product Manager | 29 months

- Conducted user discovery interviews across broadband subscriber touchpoints to eliminate journey friction points, driving a **27% lift in customer retention**.
- Audited a legacy biweekly email request workflow to gather technical requirements across sales, supply chain, and retail teams for a **centralized inventory management system**.
- Partnered with the process engineer to build a relational QuickBase inventory application, reducing recurring inventory complaints by **~60%**.
- Led vendor coordination and cross-functional user acceptance testing for an eCommerce redesign, yielding a **15% increase in checkout conversions**.
- Formulated dynamic scenario-based financial models evaluating wholesale device costs against retail margins, uncovering a **$500K net-new recurring revenue** market opportunity.
- Built automated data pipelines and executive QuickBase performance dashboards to monitor **subscriber acquisition and lifecycle health** for senior leadership.
- Analyzed subscriber tenure data to identify cancellation drivers at contract maturity, informing retention adjustments that expanded the **total addressable market by 18%**.

HEINEKEN (NIGERIAN BREWERIES) | *Lagos, Nigeria*
Manufacturing Operations Intern | 3 months

- Conducted workflow bottleneck analyses across packaging lines to automate reporting procedures, decreasing **manual operational intervention by 20%**.
- Engineered operational performance dashboards tracking daily line efficiency to accelerate **management decision-making speed by 15%**.
- Authored comprehensive standard operating procedures to establish consistent **quality assurance protocols** across shift teams.

PURDUE UNIVERSITY | *West Lafayette, IN*
Tour Ambassador | 39 Months

- Redesigned the campus tour route to encompass all student living facilities based on **prospective student feedback**.
- Built operational tracking models in Excel to optimize ambassador scheduling and **departmental resource allocation**.
- Delivered tailored institutional presentations across hundreds of annual campus tours, maintaining a **90%+ visitor satisfaction rating**.
- Formed a peer-led training committee to create unified presentation guidelines and **standardize customer-facing communication**.

PROJECTS | *2025 – PRESENT*

Reproducible Retention Analysis & MCP Agent | *Python, DuckDB, pandas, MCP, Claude, Shopify Admin API*

- Built a 9-tool Model Context Protocol server exposing DuckDB analytical routines to Claude agents for **auditable retention reporting**.
- Engineered an automated verification engine that parses report claims into schemas to test numerical and causal statements against **underlying tool outputs**.
- Reconciled 1,067,371 raw transactions to 776,577 analytical rows using a 5-rule exclusions waterfall, revealing **missing customer IDs in 22.0% of records**.
- Designed a stratified 1:1 randomized holdout reactivation experiment targeting a 324-customer at-risk cohort holding **£1.39M in historical value**.

Healthcare Provider Data Pipeline & SSRS Reporting Suite | *Python, T-SQL, SQL Server, SSRS, REST APIs*

- Architected a Python ingestion pipeline navigating strict CMS API pagination limits with exponential backoff to curate a **deduplicated cohort of 603 providers**.
- Designed normalized relational schemas in Microsoft SQL Server 2025 utilizing **T-SQL OUTER APPLY views** to flatten complex one-to-many provider relationships into a 1:1 model.
- Programmed an in-database validation engine implementing an ISO/IEC 7812 Luhn checksum to detect fatal syntax errors and identify a **48.4% directory staleness risk**.
- Deployed an enterprise SSRS reporting suite featuring parameter drill-throughs and automated SQL Server Agent jobs delivering **monthly CSV compliance feeds**.

IMDB Review Sentiment & Text Mining Pipeline | *R, RStudio, NLP, Machine Learning, Claude API, Git*

- Built a text preprocessing pipeline in R to standardize unstructured review data into **TF-IDF feature matrices**.
- Trained supervised classification models on 10,000 balanced sentiment records, achieving an **83% classification accuracy** with Logistic Regression.
- Conducted unsupervised Latent Dirichlet Allocation (k=2) to extract primary thematic structures and **top semantic keywords**.
- Connected the version-controlled analysis repository to the Claude API to enable **conversational natural-language querying** of model outputs.

EDUCATION

Indiana Wesleyan University | Master of Science, Data Analytics
Purdue University | Bachelor of Science, Electrical Engineering
