Denver, CO | (570) 939-5874 | ofilikene@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Analytical professional with experience translating ambiguous business problems into data-backed decisions, systems, and roadmaps across B2B and B2C environments. Background spans product strategy, requirements gathering, and BI reporting, including a 60% reduction in inventory anomalies through a cross-functional tool built from conflicting stakeholder workflows, and a 27% lift in customer retention driven by structured discovery. Skilled in SQL, Python, and R for data modeling and analysis, and in translating findings into clear requirements documents, dashboards, and go-to-market plans. Seeking to apply cross-functional analytical and product experience to a data-driven Product, Business, or BI Analyst role.

SKILLS

Analysis & Data: SQL, Python, R, RStudio, Data Modeling & Pipelines, Statistical Analysis (regression, t-tests, chi-square), ROI Modeling, KPI Dashboards, Trend Analysis

Product & Business: Product Strategy & Roadmapping, Requirements Gathering, Technical PRDs & User Stories, Customer Discovery, Go-to-Market Strategy, Process Improvement, Standard Operating Procedures (SOPs)

Leadership & Stakeholders: Cross-functional Leadership, Stakeholder Management, Competitive Analysis, Compliance & QA

Tools: Excel, QuickBase, Figma, SharePoint, GitHub, HubSpot, Claude

WORK EXPERIENCE

VIAERO WIRELESS | *Fort Morgan, CO*

Product Manager | Dec 2022 – May 2025

- Formulated end-to-end product strategy and roadmap ownership for broadband and IP services through comprehensive customer discovery; integrated feedback to reduce friction points, lifting customer engagement and retention by **27%**.
- Identified a recurring lost-request problem in a biweekly, email-based inventory process; led stakeholder interviews across supply chain, sales, marketing, and store teams to define requirements, then designed a QuickBase-based tool translating two conflicting workflows into a single system architecture and data pipeline.
- Delivered the tool feature-by-feature with stakeholder showcases and continuous backlog grooming, cutting lost-inventory complaints **~60%** and improving on-time delivery **46%**.
- Co-authored technical PRDs and user stories for a rebuilt eCommerce platform, owning UAT and post-launch management; diagnosed root causes of cart/checkout abandonment through usability and A/B testing, driving a **15%** conversion increase.
- Conducted market and competitive analysis to architect ROI models, uncovering a **\$500K** net-new recurring revenue opportunity in an unmapped market segment.
- Developed executive-facing **KPI dashboards** and performance reporting frameworks for the VP of Sales and Head of Marketing, tracking acquisition, adoption, retention, and product health metrics.
- Identified a **churn spike** during months 30–32 of 36-month contracts, diagnosing competitor buyout incentives and a retention-perk gap as root causes.

HEINEKEN (NIGERIAN BREWERIES) | *Lagos, Nigeria*

Manufacturing Operations Intern | Jun 2019 – Aug 2019

- Collaborated with engineering, production, and operations teams to identify process bottlenecks and automate reporting workflows, reducing manual intervention by **20%**.
- Developed dashboards tracking production output, quality compliance, and operational performance metrics, improving decision-making speed by **15%**.
- Created technical documentation and SOPs to support process standardization and workforce training.

PROJECTS

Provider Data Pipeline | *Python, SQL, SQLite, REST API*

- Built a Python CLI ingesting provider data from the public NPI Registry REST API (JSON) with pagination, retry, and rate-limit handling, loading **601** unique Colorado cardiology and dermatology providers into a relational SQLite schema.
- Wrote **14** SQL data-quality rules that passed all error-level checks and surfaced 292 records (**49%**) not updated in 5+ years, **18** missing credentials, and 2 possible duplicates; built config-driven CSV/JSON exports.
- Traced an empty export to a specialty-name mismatch, added per-search diagnostics, and backed the tool with **18** automated tests and an integration guide.

North Carolina Birth Records & Maternal Patterns | *RStudio, Excel*

- Filtered a North Carolina birth-records dataset in R to **~1,000** high-quality records, then applied regression, t-tests, and chi-square testing to evaluate prenatal behaviors and infant outcomes, delivering data-driven healthcare recommendations.

EDUCATION

Purdue University | Bachelor of Science, Electrical Engineering

Indiana Wesleyan University | Master of Science, Data Analytics
